PROFESSIONAL
EXPERIENCE

Full Stack Developer | 2025-2026

ByaHero – Real-time public transportation tracking

- Integrated the design from figma and make it responsive for mobile and desktop
- Optimized SEO Meta Tags and Descriptions for better search engine visibility.
- Deploy it into a mobile app using Capacitorjs and make the location tracking, seat availability, push notification features work even the phone is closed
- Implements AJAX polling for real-time synchronization, ensuring data accuracy without the overhead of heavy persistent connections.

Full Stack Developer | 2026

SnapEat – Food nutrition scanner powered by AI

- Initialized the project with a Flask backend, frontend templates, and SQLite database layer.
- Integrated Google Cloud Vision AI service, and Gemini for the camera scanning and food identification logic.
- Setup the backend nutrition analysis engine, added food datasets, and supported both SQLite and PostgreSQL.
